

# BINGO

## Instructions

1. Print out all of the pages in this file.
2. Cut out the pieces for the game on pages 2-4.
3. Print out the 20 trivia questions and answer key (pages 5-7).
4. Pass out up to 26 cards (pages 8-30) to your students.
5. Play GIANTmicrobes<sup>©</sup> BINGO using traditional Bingo rules or using the questions to call out the microbes.
6. Adjust the trivia questions based on your grade level.
7. Teach about and enjoy the hidden world of cells and microbes.

## TRIVIA

1. These cells are the building blocks of the nervous system and are designed to think and transmit information.
2. This virus attacks the upper respiratory system.
3. What bacteria lives inside your digestive track but some strains can cause food poisoning?
4. This virus became a widespread global menace in 2014 and it's spread through a large amount of contaminated body fluids. Some say it looks like a snake under the microscope.
5. Name this bacteria that is nicknamed the Super Bug due to its resistance to many types of antibiotics.
6. Name the cell that fights against infection and disease.
7. This fascinating organism can withstand temperatures very close to absolute zero by entering into a state called cryptobiosis.
8. What cells contain hemoglobin and are made in the bone marrow?
9. Name a microbe that is a type of mold and is found naturally in the environment.
10. What protein protects the body by telling the rest of the immune system to attack any threats.

## TRIVIA

11. This category of disease is caused by uncontrolled division of abnormal cells in the body.
12. This real virus was “brought back from the dead” in 30,000 year old Siberian permafrost. Named after a fictional monster, it replicates at a rapid speed.
13. This contains a set of biological instructions that are unique to every living creature on Earth.
14. Name a respiratory infection that is caused by orthomyxovirus and is so common that there is a shot to help prevent it.
15. What connects the brain, sensory organs and the spinal cord to the rest of the body in order to maintain control and communication?
16. What virus has caused a recent pandemic and is spread from the bite of an infected Aedes mosquito?
17. These critters have been a public health pest for a long time. They don't fly but they may visit your room to feed on human blood, causing itching and rashes.
18. This frightening disease is caused by strains of Streptococcus pyogenes, the same bacteria responsible for strep throat.
19. What is this “fowl” infection that may be highly contagious and causes itchiness and red spots?
20. This “spotty” virus has symptoms similar to Chickenpox. If left untreated, it can lead to dangerous conditions such as pneumonia and brain swelling.

## ANSWER KEY

- |                     |                  |
|---------------------|------------------|
| 1. Brain Cell       | 12. Zombie Virus |
| 2. Common Cold      | 13. DNA          |
| 3. E. Coli          | 14. Flu          |
| 4. Ebola            | 15. Nerve Cell   |
| 5. MRSA             | 16. Zika Virus   |
| 6. White Blood Cell | 17. Bed Bug      |
| 7. Waterbear        | 18. Flesh Eating |
| 8. Red Blood Cell   | 19. Chickenpox   |
| 9. Penicillin       | 20. Measles      |
| 10. Antibody        |                  |
| 11. Cancer          |                  |

**Algae**  
(Anabaena)

**Nerve Cell**  
(Neuron)

**Waterbear**  
(Hypsibius dujardini)

**Sleeping Sickness**  
(Trypanosoma brucei)

**E. coli**  
(Escherichia coli)

**Skin Cell**  
(Keratinocyte)

**Pimple**  
(Propionibacterium acnes)

**Flu**  
(Orthomyxovirus)

**Rubella**  
(Rubella virus)

**Amoeba**  
(Amoeba Proteus)

**Zombie Virus**  
(Pithovirus sibericum)

**Bone Cell**  
(Osteocyte)

**Stem Cell**  
(Stem cell)

**Stomach Ache**  
(Shigella)

**Toxic Mold**  
(Stachybotrys chartarum)

**Hay Fever**  
(Grass pollen)

**Dengue Fever**  
(Dengue virus)

**Platelet**  
(Thrombocyte)

**Cough**  
(Bordetella pertussis)

**Chickenpox**  
(Varicella-Zoster virus)

**Paramecium**  
(Paramecium caudatum)

**Bed Bug**  
(Cimex lectularius)

**Bifido**  
(Bifidobacterium longum)

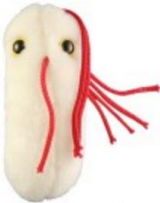

**Antibody**  
(Immunoglobulin)

**Liver Cell**  
(Hepatocyte)
